

POLI-MASK 288

Sandblast-Film

Product Information

Self adhesive stencil tape on the basis of a dimensionally stable polypropylene film with outstanding solvent resistance. Suitable for lettering and spray mask applications on all varnished, glass, plastic and metal surfaces. POLI-MASK 288 can be used on flexible materials like PVC awnings and banner material as well.

Especially to be emphasised are the following properties:

- The detachable adhesive has an excellent durability on solvent contained screen-printing and awning materials. Can be easily removed without any residues.
- The polypropylene film possesses an optimal flat surface. Even if there is any solvent influence, no surface changes like creases or blistering is guaranteed.
- Outstanding sharp outline edges, therefore colour undermining on the outline edges are completely excluded.
- Can be used on freshly varnished surfaces without leaving any residues. Ideal for multi-colour lettering.
- The stencil tape can be cut with neat, sharp and accurate outlines, it is easy to weed and it can be easily transmitted without any problems.

Technical Data

Carrier:	Polypropylene film, blue, translucent	
Adhesive:	Acrylic	
Liner:	Silicon paper, white (140g/m ²)	
Adhesion [N/cm]:	1,70	+/- 10 %
Thickness [mm]:	0,10	+/- 5 %

Standard Dimensions

1.220 mm x 50 m
